*Safe 3-point grip*

*Incorporated control system*

*Solution for narrow space*

*Light and compact*

## Easy Gripper CRANE MODULE

The Easy Grippers are a range of tools designed to help tire professionals to work faster and safer.

And now we have met the requirement and demand from many of our customers, and developed a Crane Module, so that our popular Easy Gripper can be mounted on a truck crane.

### Mobile service

Installed on a truck crane, the Easy Gripper offers the optimal flexibility allowing the driver to be able to both transport and install the big OTR and agro tires and wheels – and single-handedly.

With the Gripper very risky and time consuming handling situations become safe and easy.

### Benefits with the crane solution

The Easy Gripper Crane Module can easily and quickly be mounted on the truck crane with a quick shift system.

The remote control system can easily be incorporated in the control system of the crane.

Our Crane Module provides the crane with an extra 160° tilt function.

The Gripper has a light and compact design to optimize the center of gravity and the load capacity of the crane and of the total solution.

In accordance with the needed lifting capacity of tires and wheels, or the capacity of the truck crane, you can decide to choose either the Easy Gripper for 1 or for 2 tons lifting capacity.

### 3-point grip

The unique 3-point grip offers optimal grip and control when handling tires, and together with precise rotation and tilt functions, it allows our customers to save time, avoid accidents and manual hard and dangerous situations as well as damages on tires, rims and vehicles.

And narrow space around tires and fenders can quickly be solved by switching the top arm with a flat top arm.

### Performance – with Easy Gripper 2400-2T

- Lifting capacity 2.000 Kg/4.400 lbs
- Gripping diameter 1.450-2.400 mm/57-94"

### Special features

- Unique and safe 3-point grip
- Integrated camera system with infrared light for optimal view
- Tilt function 160°
- Precise rotation function – 50°
- Available telescopic arms for handling wide tires or duals (inside duals)
- Flat arm can be mounted in case of narrow space between tires and fender
- Quick shift system for mounting and dis-mounting on/off the truck crane
